SCF

40ft Pallet Wide

SCF's 40ft Pallet Wide container is wide enough to fit two chep pallets side by side to maximise equipment utilisation. Easily fit up to 20 pallets for safe and secure transport. Or 40 pallets by adding our Vertical Load Bars.

Key Features

- Tie rails to secure cargo
- Lashing rings to secure cargo
- SCF custom base arrangement with reinforced floors
- 40' Handling points
- Reinforced handling points to reduce damage
- F-track for freight restraint

Options

- Vertical Load Bars
- Lightweight Model
- Branding

Details

Built with high-quality materials, SCF's 20ft Maximise space and minimise freight costs by using a SCF 40ft pallet wide container. Suitable for palletised freight, heavy dense cargo or irregular freight. This container can carry up to 40 pallets with the capacity to load pallets 2 wide and 2 high with the use of the Vertical Load Bar option.

40 pallets not enough? Consider a 48ft Container in 24 pallet or 48 pallet (with Vertical Load Bar option) configurations.

Suitable for transport on road or rail, SCF's pallet wide containers have been built strong to protect cargo in transit whilst minimising damage.

With our 30+ years in intermodal experience, SCF has a range of sizes and variants to provide alternative capacity options to suit your requirements.

Specifications

40ft Pallet Wide

Specifications may vary

Internal

Length (mm)	12,041
Width (mm)	2,414
Height (mm)	2,695

External

Length (mm)	12,192
Width (mm)	2,462
Height (mm)	2,896

Weight

Tare (kg)	4,670
Payload (kg)	29,330
MGW (kg)	34,000

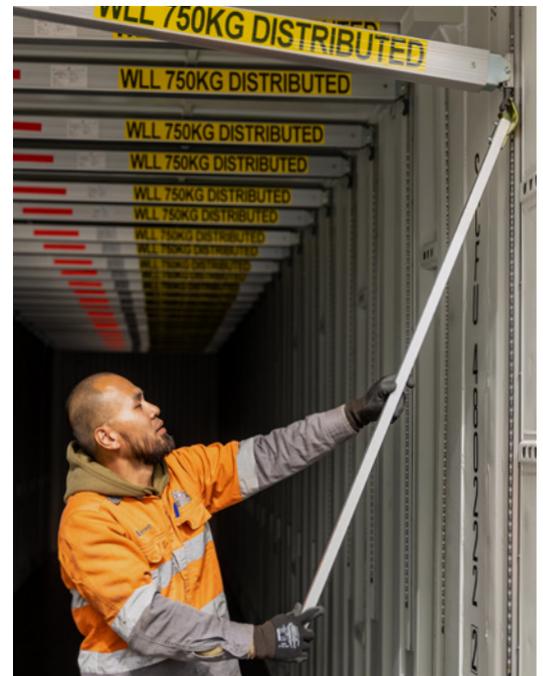

Top: Highlighted pickup points make it safer and easier to lift.

Middle Left: The 40ft Pallet Wide is a popular choice for freight requirements across Australia.

Middle Right: Vertical Load Bars can easily be deployed to increase capacity, especially for fragile freight.

Below: We have a large fleet to meet your freight requirements.
