45FT BULK LIQUID TANK

45ft Bulk Liquid Storage

SCF's 45ft Bulk Liquid Storage Tank is suited to large scale industrial cleaning and on-site storage projects. It has been designed with a range of efficient mobilisation and safety features.

Key Features

- 500mm side access for cleaning and OHS
- 2 x 500mm hatches in roof
- Sump allows full evacuation
- Full manifold allows unit connectivity for larger projects
- 500BBL capacity
- Can be double stacked to reduce footprint on site

Options

- Brine and mud mixing
- Jet mixers fitted
- Mounting points for agitators
- Double stackable in a loaded configuration
- Various linings available

Details

SCF's 45ft Bulk Liquid Storage Tank offers a scalable storage solution for the construction, waste, chemical cleaning and shutdown sectors. Tanks are fitted with 8 inch manifolds with multiple 4 inch couplings, which allows units to be easily combined to create tank farms. Each unit is supplied with an FDA approved internal lining, so they can be deployed into large scale potable water storage projects. Skid mounted for fast, cost-effective long-distance mobilisation, these tanks are a versatile solution for onsite liquid storage requirements.

Specifications

45ft Bulk Liquid Storage
Specifications may vary

Volume		External	
Litres	77,000	Length (mm)	13,716
m³	77	Width (mm)	2,500
		Height (mm)	2,896
Weight			
Tare (kg)	10,500		
Payload (kg)	76,000		
MGW (kg)	86,500
