BULK LIQUID

48ft Wheeled Bulk Liquid Tank

SCF's 48ft Wheeled Bulk Storage Tank provides a scalable storage solution that can be deployed and fully operational within days, with storage volumes of over 1 million litres.

Key Features

- 500BBL capacity (77,000L)
- 500mm side access for cleaning and OHS
- 2 x 500mm hatches in roof
- Sump allows full evacuation
- Full manifold allows unit connectivity for larger projects

Options

- Brine and mud mixing
- Jet mixers fitted
- Mounting points for agitators

Details

SCF's Wheeled tanks come in both single and dual axle configurations, allowing customers to road train units for deployments to remote projects or transport as single trailers to local sites.

The standardised manifold construction supports large volume scalable projects with very short mobilisation times reducing project costs.

Over 1 million litres of storage can be supplied within 5 days with FDA approved lining available for potable water storage if required.

This unit needs to be picked up and transported by a prime mover.

Specifications

48ft Wheeled Bulk Storage | FR50WW

Specifications may vary

Volume

Litres	77,000
m ³	77

External

Length (mm)	14,537
Width (mm)	2,500
Height (mm)	3,155

Weight

Tare (kg)	12,761
Payload (kg)	138,600
MGW (kg)	151,361
